Core Principles

Implementation Services

The first step to a successful implementation is a strategy that meets your unique needs. We start with a detailed discovery phase, followed by implementation of configurations and customizations, migrating and integrating data and deploying your new solution smoothly. We create the framework and assets that are used by our implementation partners in the ecosystem.

Our implementation methodology uses templates that are based on our institutional knowledge and industry best practices. Our agile scrum methodology allows for frequent client feedback and nimble revisions when needed.

Expert Services

In support of select implementation partners, roundCorner can provide deep knowledge and expertise of evolving products so you can gain the full potential of our solutions.

Managed Services and Support

Complex and time-consuming processes are holding you back from achieving your goals, and limited resources make it impossible to stay abreast. We help you achieve operational success by managing and operating your CRM. We'll do the heavy lifting; you can focus on your core mission.
